

CONSENT DECREE Q3 2017 QUARTERLY REPORT TRANSOCEAN LTD.

In February 2013, certain affiliates of Transocean Ltd. (“Transocean”) and several United States government agencies (the “US”) agreed to the entry of a Consent Decree to resolve matters related to the Macondo incident. Under the terms of this Consent Decree, the Transocean Ltd. Board of Directors (the “Transocean Board”) is required to receive a quarterly report. The Transocean Board has designated the Transocean Board’s Health Safety and Environment Committee (“Transocean HSE Committee”) to receive that report on its behalf.

Steps Taken to Comply

The compliance effort for each Consent Decree obligation continues to be monitored and documented. For reference and tracking purposes, the obligations are organized into seven categories. The attached chart lists each obligation and the status of Transocean’s compliance during the quarter. This information will also be discussed during the Q4 Transocean HSE Committee meeting.

Evaluation of Response/Improvements in Safety and Operational Risk Issues

On November 6, 2017, the Transocean Offshore Deepwater Drilling Inc. Health Safety and Environment Committee (“Committee”) received a detailed report regarding the company’s compliance with the Consent Decree obligations and related issues. This presentation was made by the Compliance Team Senior Manager. The Committee also heard a presentation by the Operations Director for Americas 2 related to the company’s United States operations during the quarter, including details regarding improvements in safety and operational risk identification and management, testing and maintenance of blowout preventers, downtime, and other relevant process safety information. As in past quarters, the Committee spent a considerable amount of time discussing issues of relevance to process safety, active operations and organizational structure. In addition, the Independent Process Safety Consultant (“the Process Safety Consultant”) presented a summary of the 2017 supplemental review; his findings were complimentary.

Quarterly Compliance Activities

Throughout the quarter, Transocean continued monitoring and ensuring compliance with the numerous individual Consent Decree obligations to identify and address any potential compliance challenges. Accordingly, increased scrutiny was undertaken for rigs new to United States operations to confirm compliance. As in past quarters, Transocean continued to hold monthly update calls with the US.

During Q3, the compliance team worked closely with the Process Safety Consultant to coordinate his review of information. The compliance team also held several in-person discussions to finalize the supplemental report due under the Consent Decree. The Process Safety Consultant submitted the 2017 Supplemental Report to the TODDI HSE Committee on October 17, 2017. The report was complimentary of Transocean’s policies and procedures regarding Process Safety.

Also in Q3, the compliance team continued to have frequent interaction with the Independent Consent Decree Compliance Auditor (“Independent Auditor”) by holding monthly update calls and responding to the Independent Auditor’s information requests. Additionally, the

Independent Auditor conducted a detailed multi-day biannual audit in Houston and has scheduled two rig visits for November 2017.

One minor Consent Decree non-compliance was identified and timely reported during the quarter. The non-compliance related to a required list of employees in certain designated positions. The list was generated during the transition to a new personnel system and was later found to be incomplete. This was an isolated event and Transocean encountered no systemic problems or challenges related to continued compliance with the obligations.

Input/Recommendations to the Transocean Board; Request for Assistance

For Q3, the Committee is comfortable with the information provided and the efforts being undertaken regarding compliance with the Consent Decree. The Committee is also comfortable with the information it has been provided related to Transocean's response and improvements in safety and operational risk identification and management of risk, including Transocean's compliance with the process safety related aspects of the Consent Decree, such as blow out preventer testing and maintenance, training and well control.

Finally, based on the Q3 Compliance update provided by the Compliance Team Senior Manager and the Operations Director for Americas 2, the Committee is confident that Transocean remains compliant with each obligation under the Consent Decree. The Committee does not seek additional assistance from Transocean to help ensure continued compliance.

Officer Certification

I certify under penalty of law that this document and any attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Dated: November 6, 2017

Brady K. Long
Senior Vice President and General Counsel
